

## Project Documentation: Script Editing and Publishing System

### Project Overview

This project is a script editing and publishing management system where Writers, Admins, and Editors collaborate to refine and finalize scripts for publication.

### Workflow Summary

- Writer uploads the script and pays editing fee using Flutterwave. or MPesa
- Admin reviews and assigns the script to an Editor.
- Editor completes Structural Editing, Proofreading, and Design Editing.
- Editor submits completed script.
- Writer gives final approval and script is marked Ready for Print.
- admin can add the writer and they can generate the report for the writer on book progress

### Technology Stack

Framework:Laravel10+/ Django

Database: MySQL

Payment Gateway:Flutterwave or MPesa or Paystack

Version Control: Git

### User Roles & Responsibilities

#### Writer

- Uploads Manuscript
- Pays editing fee
- Tracks progress
- Sees final status
- Gives final approval

#### Admin

- Reviews uploaded Manuscript
- Assigns editor
